

COSTS / COMMISSION

- **Enrollment Costs:** MOVii S.A does not charge any enrollment fee.
- **Acquiring Commission:** This is the commission associated with the service, which is defined by economic activity and broken down by card type and brand.
- **Composition of the Acquiring Commission:** It is composed of:
 - ☒ Interchange Fee
 - ☒ Variable Fee
 - ☒ Fixed Fee
 - ☒ Compensation
- **Interchange Fee:** This fee depends on the MCC “Merchant Category Code” corresponding to the economic activity of the merchant. These fees are stipulated by the brands according to the conditions of the card issuance used and are governed by the provisions of the relevant year’s interchange guide. They are subject to changes determined by the respective brands, which will be applied mandatorily and automatically. This cost will be transferred according to the brand’s clearing. If an incorrect MCC is registered to the sub-merchant, causing a retroactive charge by the brand, it will be automatically transferred to the aggregator.
- **Variable Fee for Transaction Processing:** A variable component that includes infrastructure, gateway, operation, licenses, and permits from the Superfinanciera, brands, and transactional monitoring management. It applies to 100% of the transactions processed in each compensation period (Sales, Pre-authorization, Reversals, and Refunds).
- **National and International Fixed Fee:** This corresponds to the fixed costs per transaction of the brands and financial and clearing processes of the transactions. This fee is subject to changes imposed by the brands on fixed fees or increases resulting from mandates or processing non-compliance by the aggregator.
- **Compensation:** This corresponds to the process carried out to determine, at the close of an established period, the balance owed to each of its participants as a result of the payment orders or fund transfers processed in the low-value payment system, and to extinguish their obligations to each other, as established by the current regulations.
